

HOW TO CAN PEACHES

BEGIN WITH TREE RIPENED BRECKNOCK ORCHARD PEACHES.

1. Wash peaches. Cut peach in half with a sharp knife. Gently twist peach to get the two halves apart. Remove stone, and peel peach.
2. Place peach halves (or dice in bite size pieces) into Quart canning jars. Fill with peaches to "neck" of the jar.
3. Sprinkle 2 Tbsp. sugar on top of peaches. Fill with room temperature water till peaches are covered.
4. Clean rims of jar, then screw lid and ring on jar securely.
5. Place jars in pot, and then cover jars with water. Water should be 1/2" above lid of jars. Turn burner on high, cover pot.
6. When water reaches a gentle rolling boil, then turn to medium heat. Keep a gentle boil for 8 minutes.
7. After 8 - 10 minutes, remove jars from water.
8. Allow to cool for 24 hours.
9. Enjoy for up to 1 year.
